She Counted on Us to Save the Trip of a Lifetime

A young mother with a new diagnosis of multiple sclerosis planned the trip of a lifetime for her family. She needed to start her medication *before* leaving on the trip.

- First prescription was denied
- Case manager worked with the provider to prescribe an approved medication
- The specialty medication was taking a while to arrive
- Case manager called the pharmacy daily and, before the young mother was set to leave, the **medication arrived**

The mother sent the case manager a picture of three happy kids – **and a healthy mom** – on their trip of a lifetime.
